ANALYSIS PROBLEM # 16

Name: _____ Period: _____ Row: _____ Date: _____

PROBLEM SIXTEEN: Cabin Fever: Four good friends decided to plan a vacation together to see the scenic Smoky Mountains of Tennessee. After making all the arrangements, resort reservations, and taking two weeks off from their jobs they met at the airport in Richmond, Virginia. One of the men had a private pilot license and they had rented a small two engine plane to fly into the airport near the resort. They were last seen leaving the Aunt Bees Mountain Resort in the Smoky Mountains for home in early December. When they did not return from their vacation search teams were sent to find the men. They were all eventually found dead in a cabin 20 miles from the airport. How did they die?
