### ANALYSIS PROBLEM # 30

Name: \_\_\_\_\_ Period: \_\_\_\_\_ Row: \_\_\_\_\_ Date: \_\_\_\_\_

**PROBLEM THIRTY: Birdie -Three:** You are playing golf with some friends and hit a five iron shot against the wind onto the green only three feet away from the pin. Suddenly, a branch with several dried leaves is blown across the green with the leaves covering the ball. Without knowing what the technical rule of golf was in the situation - lest you incur a penalty for removing any item or obstacle between the ball and the hole - as your playing buddies had insisted, you solved the problem. Not only did you do that, but you proceeded to neatly strike the ball and got your birdie-three! How did you solve your problem?
